

Status of Recovery Populations for the Federally Listed Red-cockaded Woodpecker (*Picoides borealis*)

Status of Designated Recovery Populations*

- Recovered
- Potentially Recovered
- Not Recovered

Ecoregions w/RCW Populations

- Recovery Units
- Non-Recovery Units

* = Based on active cavity trees (ACT) in the *Species status assessment report for the red-cockaded woodpecker (Picoides borealis)*. Version 1.3 as a percentage of delisting goal in the *Recovery plan for the red-cockaded woodpecker (Picoides borealis): second revision*

Note: Fort Moore and Fort Johnson have been renamed from the previous names, Fort Benning and Fort Polk, respectively. This renaming is part of a DoD effort to replace the legacy of confederate soldiers with American military heroes. Those new names are used here.
